RE: Amendment to Include Another
Discharge Point; General Coal Mining
Permit UTG040006

Dear Mr. Mangum:

We hereby acknowledge receipt of the Notice of Intent (NOI) for coverage under the Utah General Permit for Coal Mining. The NOI for the addition of another discharge point to the already existing permit coverage under permit number UTG040006 for Co-op Mining Company is considered adequate.

The present permit covers the following discharge points:

Discharge Point 001:	Trail Canyon Mine Sediment Pond.
Discharge Point 002:	Bear Canyon Mine Sediment Pond A.
Discharge Point 003:	Bear Canyon Mine Sediment Pond B.
Discharge Point 004:	Portal-Underground Seepage Water Overflow.
Discharge Point 005:	Bear Canyon Culinary System Overflow.

The permit will be expanded to cover the following discharge point with monitoring requirements as required by the general permit:

Discharge Point 006:	Bear Canyon Mine Sediment Pond C.
----------------------	-----------------------------------

Mr. Kimly C. Mangum, P.E.

Page 2

February 2, 1993

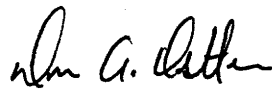

Coverage will begin immediately on Discharge Point 006, and all requirements and conditions of the permit will be in full force and effective from the date on this letter.

Preprinted DMR's will not be issued for the discharge point because of the length of time left in the General Permit. Enclosed are 5 blank copies of DMR forms to report any discharge from the Discharge Point 006.

If you have any questions please call Harry Campbell at (801) 538-6146.

Sincerely,

Utah Water Quality Board

Don A. Ostler, P.E.
Executive Secretary
